

## WIRELESS COMMUNICATIONS INSTALLATION, TESTING & MAINTENANCE

*Tailored & Enhanced Turnkey Solutions*

*Serving The Wireless Industry Since 1989*

*Founded & Operated By Telecom Professionals*

*Proven Reputation For Providing High-Quality, Reliable Service On-Time & On-Budget*

*Specializing In All Phases Of Communication Systems Installation, Testing & Maintenance*

### STATEMENT OF QUALIFICATIONS IN-BUILDING SERVICES

Whether in an office, airport, hotel, or convention center, today's professionals demand the flexibility of high-speed wireless connectivity "anytime, anywhere." Whether you are looking for a network to support cellular/PCS, Wi-Fi, or public safety, System Integrators has the right resources, tools, and expertise to design and implement your in-building wireless system. We make possible results in major cost savings and service level improvements for enterprise owners, tenants, and service suppliers. As a solution provider, System Integrators works with best-in-class products from leading industry vendors to cost-effectively design a wireless system that meets your unique requirements.

System Integrators provides a broad range of professional services that help network operators plan, deploy, and maintain their networks. System Integrators' turnkey services make us the ideal resource for projects requiring in-depth, hands-on network planning and deployment.

#### Planning

System Integrators' planning services incorporate network assessment, design engineering, and project/program management to create a thoughtful and methodical approach regardless of network infrastructure.

#### Design Engineering

System Integrators has a proven track record in coordinating the many factors essential to translating a design into a fully operating system. For each project, our engineers develop a comprehensive package containing diagrams, installation notes, deliverables, commissioning and provisioning documentation, test datasheets and other information to ensure that the deployment is completed successfully. We also provide an installation package including material lists, cable-running diagrams, configurations, and other critical information based on the detailed scope of work.

#### Project Management

We offer a wide range of project management services. Our project managers are able to support other System Integrators professional services as well as to coordinate large projects for our customers involving multiple vendors. Our project analysis offers detailed plans for:

- Project schedules and critical paths
- Communications
- Quality Management
- Material Procurement
- Change Management
- Vendor Management
- Project Budget

#### Deployment

Our deployment services incorporate project management, design, installation, commissioning, and testing to facilitate:

- Simplification of the deployment process
- Improved quality
- Reduction of service interruptions
- Reduction in deployment costs

#### Maintenance

There is steady pressure, in today's demanding business market, to keep your network consistently available and operating at required performance levels. Network outages and downtime mean reduced profitability. System Integrators offers maintenance services designed to keep your network running at its peak. Our maintenance services consist of:

- Comprehensive network assessment
- Preventive maintenance
- Emergency response
- Parts Management
